SUPPLEMENTAL BID BULLETIN NR. DND/GA-MYOA-MRM-2019-01
(Supply and Delivery of 2,051 MT Metallic Raw Materials for the
Government Arsenal)

This Supplemental Bid Bulletin is issued to inform prospective bidders of the following changes, modifications, amendments, or additional requirements that form part of the Bidding Documents for the Supply and Delivery of 2,051 MT Metallic Raw Materials under IB No. DND-BAC # GA-MYOA-2019-01:

CLARIFICATIONS ON THE BIDDING DOCUMENTS

ITEM NO.	REFERENCE	POINTS OF CLARIFICATION	ANSWERS
1	Schedule of Requirements	When is the approximate date of LC opening for the delivery of MRM requirement for 2019, 2020 and 2021?	The approximate date of LC opening shall be within January of each year.
2	Schedule of Requirements	Can we extend the delivery of the 2020 and 2021 to May 31, 2020 and May 31, 2021? This is assuming that LC could only be opened late January or Early February of each year.	The request is denied due to the criticality of the items.
3	Performance Security	How long is the required validity of the Performance Security?	The validity period is for the duration of the contract which is three (3) years.
4	Performance Security	When is the approximate and appropriate time to issue the Performance Security?	The winning bidder shall post a performance security within a maximum period of ten (10) calendar days from

DND Core Values: Patriotism, Professionalism, Good Governance

			receipt of the Notice of Award.
5	Performance Security	One time submission to cover the three year requirements until the last delivery for 2021 could not be met and complied.	The proposal is denied. Submission of the performance security is required to guarantee the faithful performance by the winning bidder of its obligations under the contract. The project shall have only one (1) contract for the three (3) year period.
6	Technical specifications	We would like to request for a revision on length tolerances of 3,4x41,.4x2000mm/3,25 x38,10x2000mm/3,60x4 9,30x2015mm/brass sheets (on page 77, 78, 79). Is it possible to change the length tolerances as -0/+15mm instead of existing?	The request is denied because the additional length can no longer be used and will end up as scrap/wastage.
7	Correction of defects	Can we request extension for the period of correction from 30 to 90 calendar days from receipt of notice? This is due to the transit time from Turkey to Philippines and our Principal needs 30 - 60 days production time.	The change in the period for correction of defects in the warranty period from 30 to 90 calendar days from receipt of notice can be allowed.

As a result of the above clarifications, the following are the amendments to the bidding documents:

REF	PARTICULAR	FROM	TO
SCC CL 17.4	Period for correction of defects	The period for correction of defects in the warranty period is 30	The period for correction of defects in the warranty period is 90 calendar days from

		calendar days from receipt of notice.	receipt of notice.
SCC Cl. 10.5.f	LC expiration date	CY 2019 – 210 calendar days from receipt of Notice to Proceed	CY 2019 – 210 calendar days from receipt of Notice to Proceed CY 2020 – June 30, 2020 CY 2021 – June 30, 2021

Please be guided accordingly.
